# LOMA INCIDENT

CA-SCU-006912

## INCIDENT ACTION PLAN

### OPERATIONAL PERIOD

10/3/2016 0700

to

10/4/2016 0700

## INCIDENT OBJECTIVES (ICS 202)

<b>1. Incident Name:</b> LOMA		<b>2. Operational Period:</b>		Date From: 10/3/2016	Date: 10/4/2016
				Time From: 0700	Time: 0700
<b>3. Objective(s):</b>					
<b>Management Objectives:</b>					
-Provide for and maintain public and first responder safety by utilizing the incident safety analysis process					
-Minimize damage to structures, private property, other improvements and sensitive natural and cultural resources in and around the fire area.					
-Ensure the cooperation and collaboration are maintained at all levels of the incident.					
-Provide for timely and accurate incident information via the media, public meetings and public contact.					
-Foster and enhance community and political relationships.					
-Be financially responsible for all management and fire suppression tactics.					
-All management actions and tactics will be focused on serving, safeguarding and protecting the citizens and natural resources of Santa Clara and Santa Cruz Counties.					
<b>Control Objectives:</b>					
-Keep the fire East of North Fuel Break / Loma Prieta Road / Summit Road					
-Keep the fire South of Almaden Reservoir					
-Keep the fire West of Uvas Road					
-Keep the fire North of Croy Ridge					
<b>General Situational Awareness:</b>					
-Another weather disturbance will move through the region today with an increased chance for scattered showers across the central coastal mountains					
-Monitor firefighter fatigue, rugged terrain, critically dry fuels and drought stressed trees.

## INCIDENT Weather Forecast

FORECAST NO: 5

NAME OF FIRE: Loma

PREDICTION FOR: Day/Night SHIFT

UNIT: IMET – Bob Nester

SHIFT DATE: Oct 3, 2016

SIGNED:

TIME AND DATE

FORECAST ISSUED: 2100 Oct 2, 2016

Incident Meteorologist

---

**WEATHER DISCUSSION:** A weather disturbance in this cool northwesterly flow will impact the Loma fire once again producing another round of scattered showers. The potential for a shower or two is a bit greater today however any shower that moves over the area will produce less than .10" of rain. Expect winds to generally be from the north to northwest up to 10 mph. Rh values will continue to be high with pretty cool temperatures that struggle to get much above 60 degrees.

**TEMPERATURES:** Max: 58-64  
Min: 40-45

**Min HUMIDITY:** 48-58% during the day  
75-85% evening and overnight

**20 FT WINDS:**

Northwest to north 5-10 mph with a few gusts to 15 on the ridges.  
Northwest to north 2-4 mph after 1800.

**MARINE LAYER:** 500 feet

---

**EXTENDED FORECAST** **Tuesday through Friday** The trough of low pressure responsible for the northerly winds and scattered showers will have moved east allowing for a return to dry and warmer weather with light southwesterly winds. Expect a slight increase in the marine layer each day. Temperatures will rebound into the 70s to lower 80s by the end of the week with min RHs in the mid to upper 20% range.

## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 006	<b>TYPE OF FIRE:</b> Wildfire
<b>FIRE NAME:</b> Loma Fire	<b>OPERATIONAL PERIOD:</b> 10/03/2016 0700-0700
<b>DATE ISSUED:</b> 10/02/16	<b>TIME ISSUED:</b> 1800
<b>UNIT:</b> CA-SCU-006912	<b>SIGNED:</b> <i>Marshall Turbeville</i>
	<b>Typed/printed:</b> Marshall Turbeville (FBAN)

### INPUTS

#### WEATHER SUMMARY:

A weather disturbance in this cool northwesterly flow will impact the fire once again producing another round of scattered showers. The potential for a shower or two is a bit greater today however any shower that moves over the area will produce less than .10". Expect winds to generally be from the north to northwest up to 10 mph. Relative humidity values will continue to be high with pretty cool temperatures that struggle to get much above 60 degrees.

**TEMPERATURES:** Max: 58 – 64                      Min: 40 – 45

**MIN HUMIDITY:** 48 - 58% during the day    75 - 85% evening and overnight

**20 FT WINDS:** Northwest to north 5 – 10 mph with gusts to 15 mph on ridges Northwest to north 2 – 4 mph after 1800.

### OUTPUTS

#### GENERAL:

Weather conditions continue to moderate fire behavior allowing for containment and mop-up. Underlying drought stressed fuel conditions still exist with steep topography. The potential for torching trees has decreased. Spotting is a remote possibility from torching trees or rollout during dry and warm portions of the shift. Receptive fuel beds have been reduced by the increase in relative humidity over the past 72 hours. Larger dead and down fuels will continue to smolder. Energy Release Components (ERC) and 100-hour fuels have returned to near normal conditions. 1000-hour fuel moistures are increasing but are still below normal. Conditions will be favorable for mop-up.

**FDFM:** 8% (lowest/afternoon)    **LAL:** 1

#### SPECIFIC:

**Division E:** Handline in steep terrain in timber litter fuels with unburned forest canopy. Potential for falling trees and rollout.

**Division G:** Ridgetop road and dozer line exposed to wind with islands and pockets below line.

**Division M/N:** Ridgetop line with varied elevation and fuel types.

**Division P/Q:** Ridgetop and canyon bottom line primarily in grass and oak woodland. Potential for rollout below slopovers with underslung line. Islands and areas of residual burning.

**Division R:** Varied elevation, fuel types, and fuel consumed by the fire. Fire has burned near bases and through the timber litter of large trees including Coastal redwoods. Islands and areas of residual burning. Potential for rollout.

Fire behavior for spot fires during optimal conditions burning upslope with wind and slope in alignment.

Fuel Type	Flame Lengths (feet)	Rate of Spread (feet/min)
Grass/Brush	4 – 5 (Head)    2 – 4 (Flanking)	Up to 10 (head)
Timber Litter	1 – 3 (Head)    Less than 1 (Flanking)	Up to 2 (head)

**Probability of Ignition:** 40% in afternoon and early evening, lower during remainder of shift

**Spotting Distances:** Up to 0.3 miles

#### AIR OPERATIONS:

Cloud cover throughout day

Sunrise: 0703    Sunset: 1851

### SAFETY

- Be aware of rolling material on steep terrain.

## LOMA INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS/CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	DRIVING HAZARDS	Slow Down! Drive defensively! Expect the unexpected around every curve. Drive with headlights and seatbelts on. Narrow roads with limited passing room. Coordinate your movements on one-lane roads. Use warning devices when operating near traffic.
ALL	FATIGUE/COMPLACENCY	Be alert for signs of fatigue and take breaks as necessary. Monitor incoming resources for level of fatigue. Drink water before, during and after shifts, up to 1.5 gal. each shift. Be alert for signs of heat stress in yourself and others; use the buddy system. Eat small meals often and when possible.
ALL	STEEP TERRAIN / ROLLING DEBRIS	Watch your footing while hiking in steep terrain. Be careful of loose rolling debris. Maintain Situational Awareness.
ALL	HAZARD TREES	Identify and isolate the area to provide for the safety of others. Flag and make proper notifications. Do Not Fall trees out of your certification level.
ALL	MOP UP	Conduct thorough briefing for all personnel (inside rear cover IRPG). Use all required PPE, including eye protection. Maintain proper spacing and overhead clearance. Be alert for stump holes and root cavities. Minimize exposure to smoke, and rotate personnel into clean as practical. Evaluate unburned islands/Increase situational awareness.
ALL	FIRE SUPPRESSION REPAIR	Stay alert working around heavy equipment working in the area. Monitor safe working distances. Utilize communication with heavy equipment operators (radio or hand signals). Maintain accountability of personnel at all times. Avoid working below dozers, watch for rolling material.
ALL	BACKHAUL	Use proper lifting techniques. Be aware of stump holes. Watch out for trip hazards and loose footing.
ALL	POWER LINES	Follow <b>Power Line Safety</b> guidelines (IRPG pg.24.) Communicate power line hazards to supervisor and hazard flag accordingly. Flag area around downed power lines and deny access. Treat all downed power lines as energized.
ALL	PERFORM TAIL GATE SAFETY MEETINGS	Everyone should be briefed on the conditions and circumstances regarding the fire and their assignments per the IRPG. Ensure all personnel have PPE, food, and water.
Incident Name: Loma Fire CA-SCU-006912 ICS 215a		DATE PREPARED: October 02, 2016 1530 hrs Prepared by: Chad Thompson SOF(T) IMT2 <i>Chad Thompson</i> OPERATIONAL PERIOD October 03, 2016 0700-0700

## LOMA HEALTH AND SAFETY MESSAGE

We Are **ALL** accountable for **SAFE** behaviors

**INCIDENT:** Loma Fire CA-SCU-006912

**DATE:** October 3, 2016

**TIME:** 0700-0700

### Situational Awareness at All Times!

*When It comes to Safety, The only thing worse than being oblivious to the unknown is ignoring the obvious....*

**Hazard trees:** Survey your work areas for hazard trees, flag and restrict access, use only qualified personnel for tree felling. Review and follow **Hazard Tree Safety**, pg. 22-23 in your IRPG.

**Steep slopes/rolling material:** Watch your footing while hiking in steep terrain. Be careful of loose rolling debris. Maintain Situational Awareness.

**Personnel:** Manage yourself and those around you for fatigue. Drink fluids frequently and eat nutritious food regularly. As fatigue increases, injuries tend to increase also. Keep an eye on your crew and partner. Stay engaged and make smart decisions.

**Driving:** Slow Down! Drive defensively. Expect the unexpected around every curve. Drive with headlights and seatbelts on. There are narrow roads with limited passing room. Coordinate your movements on one-lane roads. Use warning devices when operating near traffic.

**Complacency:** All PPE must be worn, including shrouds, when working on the fire line. Mop up requires your situational awareness even without active fire. Unburned fuels can reignite suddenly and turn against you.

**Mop Up:** Conduct a thorough briefing for all personnel. Use all PPE, including eye protection. Maintain proper spacing. Be alert for stump holes. Evaluate unburned islands and stay alert.

**Review your ICS 206 and know what to do in the event of a medical emergency.**

**Lookouts, Communication, Escape routes, Safety zones**

#### Fire Suppression Repair

Stay alert working around heavy equipment:

- Utilize communication with heavy equipment operators (radio or hand signals).
- Monitor safe working distances
- Avoid working below dozers, watch for rolling material.
- Maintain accountability of personnel

#### Backhaul in Progress:

- Use proper lifting techniques,
- Be aware of stump holes
- Watch out for trip hazards and loose footing.

Incident Safety Officer: **Chad Thompson SOF(T)**

Incident Commander: **Sean Kavanaugh**

# FIRE SUPPRESSION REPAIR

## LOMA INCIDENT

CA SCU-006912

**Fire Suppression Repair is the repair of damage caused directly from fire suppression activities, it is not the repair of areas damaged by the fire. We cannot upgrade facilities beyond their pre-fire condition.**

### Start Early!

Repair work should start as soon as practical. However, repair activities shall not hamper or conflict with fire suppression actions. When possible, construct waterbars on dozer lines, hand lines, and safety zones concurrent with line construction or mop-up operations. Scattered trash shall be collected and deposited at Drop Points. Police your areas.

### Repair Site Inventory:

Report Fire Suppression Repair needs as soon as possible. The Suppression Repair Group will evaluate each site, develop a specific repair plan, and schedule an appropriate repair with necessary resources.

### Infrastructure Damage:

Report the location and type of suppression damage to infrastructure. Common examples include:

- Fences /gates
- Culvert/ Bridge/ Other watercourse crossings
- Water sources
- Utility distribution line; above/below ground.
- Restore barriers on roads previously closed but opened for suppression activities.
- Remove trash and debris, including flagging and signs when no longer needed.
- Misc. damage to residential property.

### Natural Resource Damage:

This category represents repairing problems caused by fire suppression activities (direct effect) and to prevent likely future problems such as accelerated erosion caused by winter rains (indirect effect).

- Construct drivable waterbars or rolling dips on unsurfaced roads.
- Construct waterbars on all dozer and hand lines according to the following Specifications: Water bars shall be cut diagonally into firm soil at least 6" deep and have a berm at least 12" in height. Water bar should have a 30-45 degree angle to the fall line. Outlets must be open and directed onto the least erodible material possible.

Line or Road Gradient (%)	0-10%	11-25%	26-50%	>50%
Waterbreak Spacing	100'	100'	75'	50'

- Remove (or breach) all berms created by suppression activities unless necessary to divert runoff from a sensitive site.
- Remove soil and debris from culverts and drainage facilities deposited by fire suppression activities.
- All slash, soil, and debris deposited into watercourses shall be removed and stabilized as feasible.
- All work within 100 feet of a watercourse, cultural site or other sensitive location shall be performed by hand crews to avoid further damage and with guidance from the FSR Group.

### Cultural Site Damage:

Immediately report any known or suspected archaeological/historical site through chain of command to the incident Archaeologist and/or the Fireline Suppression Repair Group. This includes air tanker drops upon a site. Use least disturbing suppression methods possible unless life safety is at risk. Flag site perimeter for identification. Removing or disturbing any artifact is not permissible.

### Comp Claims Issues:

Damaged resources that are too large or complex for the Fireline Suppression Group to handle shall be turned over to Comp Claims for processing. Examples of such issues include damage to pavement, bridges, pipelines, etc.

**Fire Suppression Repair Reporting**

**Cell Phone #:**

Date: \_\_\_\_\_

[illegible]

**Please turn into the Plans Section at the end of each shift.**

**NOTE: This form must not be used to certify lost, stolen or worn out property. A STD 152 Property Survey Report must be completed.**

# DEMOBILIZATION PLAN

## Loma Fire

### CA-SCU-006912

## DEMOB PROCEDURES

- CHECK THE DEMOB LIST EACH MORNING. YOU CAN FIND THE DEMOB LIST THROUGH THE “QR” CODE ON THE I.A.P. COVER OR ON LISTS POSTED THROUGHOUT CAMP. **ONLY REPORT TO DEMOB AT YOUR SCHEDULED TIME.** EARLY ADMITTANCE WILL NOT BE ALLOWED.
- PICKUP A DEMOB CHECKOUT FORM (ICS-221) FROM THE DEMOB UNIT, THEN GO TO THE FOLLOWING UNITS TO OBTAIN THE NECESSARY SIGNATURES:
  - ✓ SUPPLY UNIT
  - ✓ COMMUNICATIONS UNIT
  - ✓ GROUND SUPPORT/VEHICLE INSPECTION\*\*\*
  - ✓ DOCUMENTATION UNIT
  - ✓ TIME UNIT
  - ✓ TRAINING UNIT (IF APPLICABLE)
  - ✓ ACCOMMODATIONS (IF APPLICABLE)

### \*\*\*VEHICLE INSPECTION:

- THE DEMOB UNIT WILL INFORM YOU IF THE VEHICLE NEEDS TO BE INSPECTED.
- YOU MUST HAVE THE ICS-221 DEMOB FORM WITH YOU AT VEHICLE INSPECTION.
- A VEHICLE INSPECTION TIME WILL BE PROVIDED WHEN YOU INITIALLY ARRIVE TO THE DEMOBILIZATION UNIT.
- **DO NOT REPORT FOR VEHICLE INSPECTION PRIOR TO YOUR APPOINTMENT**

RETURN THE COMPLETED ICS-221 FORM TO THE DEMOB UNIT AND TRAVEL HOME SAFE!

# ***TRAINING SPECIALIST MESSAGE***

**Tuesday, October 4<sup>th</sup> at 1900 hrs. is the deadline to close the training package for this incident.**

**Regardless of home agency, in order to ensure incident documentation of any training assignment – You must close your assignment with Training.**

**Bring a completed individual performance rating**

**ICS 225/Taskbook/Qualifications card  
And Evaluator's Recommendation  
to the exit interview.**

**Remember: NO DOCUMENTATION - IT DIDN'T HAPPEN!**

**Thank you**

***Claudia Soiza***

**949 632-7813**

# CAL FIRE

## INCIDENT MANAGEMENT TEAM

### WATER USAGE PLAN

### *California Drought Emergency*

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/owner.

#### **Fireline personnel- (During mop up operations)**

- Use Pencil Hose and Garden Nozzles with Shut-Offs.
- Use Back pumps.
- Use Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely.
- Locate/Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline.

#### **Road Maintenance and Repair-**

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind etc.).
- Consider use of tertiary or treated water.

#### **Aviation Operations-**

- Consider use of Gels, Foams and Retardants. Set up portable plants.
- Consider using Blivits and Pencil Hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops.

#### **Private Water Supplies-**

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, ICS-214, Water Usage Reports) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

#### **Public/Municipal Water Supplies-**

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Note locations on incident map.
- Use alternative or reclaimed water sources when available. Note locations on incident map.
- Make arrangements for reimbursement and damage claims if needed.

#### **Management and Supervision-**

- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance.
- Review this check list and brief daily.

Water Usage Guidelines
